TOP DOLLAR ENVIRONMENTAL POLICY.

Top Dollar Metal Recyclers is committed as a company to conducting our business operations in a way that is not harmful to the environment. We strive to provide services and conduct our recycling processes in conservative ways that minimise the environmental footprint. We endeavour to meet these obligations in the following ways:

- Promotion of ecological thinking around all processes.
- Education of our policy to all team members, contractors, and suppliers.
- Reporting of potentially hazardous activity through management.
- Continuous monitoring of environmental best practice.
- Remaining educated around technological advancements.
- Investing in research to find new methods of recycling problematic materials.
- Regularly reviewing our ecological performance through environmental scorecard.
- Regularly monitoring processes to seek opportunities for improvement of our systems.

The Top Dollar team strives to always conduct its operations in a responsible manner. We seek to manage the environmental risks associated with our recycling operation and seek to educate our team, suppliers and stakeholders about the importance of minimising the impact to our environment. It is the responsibility of all parties to contribute to the effectiveness of this policy and breaches or contradictory behaviour will result in serious disciplinary action.
